

Function Generator

FG-2002

HTC
INSTRUMENTS

Specifications:

- 5 digit LED display (including 3 digits for voltage)
- Frequency and amplitude displayed simultaneously
- Output waveforms: sine wave, square wave and triangle wave
- Frequency of output signal: 0.2Hz ~ 2MHz
- Duty cycle adjustable: 20% ~ 80%
- Width of output signal adjustable continuously
- Amplitude without attenuation: 0.9V ~ 10V
- Amplitude with -20dB attenuation: 100mV ~ 1V
- Amplitude with -40dB attenuation: 10mV ~ 100mV

Feature :

- Power : AC 110/220V
- **Standard Accessory** : Power Chord, Manual
- **Dimensions** : 270 x 215 x 100mm
